Subject: Motivation to Study in Germany

Introduction:

As an inquisitive and motivated student, I am Krishna Narayan Sah, the eldest son of Mr. Hari Lal Sah and Mrs. Uma Devi Sah. Born on August 25, 1997, in Kamlapur, Saptakoshi-10, Saptari, Nepal, I come from a close-knit family of four, including my parents, my younger brother, and myself. Holding a Nepalese passport issued on August 4, 2023 (BA0151144) and Nepalese citizenship issued on May 18, 2017 (16-02-74-00347), I am proud of my Nepalese heritage. With unwavering support from my parents, both morally and financially, I am driven to pursue a Master's degree in Cybersecurity in Berlin, Germany.

Academic Background

Regarding my Academics, I completed my early Education in 2015 from Mother Memorial English Boarding School, Fattepur, Saptari, Nepal and secured 62.5%. In 2019, I completed my Higher Secondary Education from Orchid public Higher Secondary School, Biratnagar, Nepal with an overall 57.7%. Also, I have completed my bachelor degree at the British College Pvt Ltd. The college is affiliated with Leeds Beckett University, UK. I graduated with an Upper Second Class Honour in 2023. For studying in Germany, I have studied in the Medium of instruction(MOI) in order to pass the language requirement.

Reason for choosing Germany

I chose Germany because the educational system is high-class, and combines theoretical learning and practical knowledge. The universities in Germany offer world class programs, innovative research opportunities, and a rich academic environment that align perfectly with my academic and career goal.

Additionally, The cost of living and studying in Germany is comparatively lower than other countries like UK, USA, Canada, and Australia etc. Making it a more financially sustainable option for me. This allows me to focus on my study and extracurricular activities without being burdened by excessive financial strain.

Reasons for choosing Arden University Ltd

When I did my research, I discovered that there are many universities that offer master programs in cybersecurity. such as:-

1. Code University of Applied Science:- It Focuses on only practical skills and project-based learning. There is no collaboration between industry and university.
2. SRH Hochschule Berlin:- It emphasizes a hand-on approach to cybersecurity challenges and industry-relevant coursework.

When I compared these universities, The Arden university is best for me because It covers a wide range of advanced topics relevant to the cybersecurity industry. The

program is designed to provide not only theoretical knowledge but also practical knowledge on hand-on projects, industry collaboration, and build a necessary framework for long-term success in a short period of time. The practical approach ensures that graduates are well-prepared for the challenges and of the cybersecurity landscape.

Furthermore, Arden University's flexible study option, including part-time and blended learning, provides me with the flexibility to balance my study with other commitments.

My family background and Financial sponsors:

My family has four members, and they are my biggest inspirations. They've always supported me, especially financially, for my education needs like tuition fees, housing, insurance, and living expenses while I'm in Germany. I'm really thankful for their sacrifices, and I'm determined to make them proud. Also, they've paid for all my tuition fees for the entire time (1 year) I'll be studying. It shows how much they believe in me and my future.

I understand the financial implications associated with studying and living abroad. I have diligently made the necessary arrangements and secured sponsorship to meet these expenses. I am fully prepared to responsibly manage my financial commitments during my stay in Germany.

Commitment to return

After completing my master degree in Germany, I am motivated to return to my home country because of my close-knit and supportive family. They have always been there for me, nurturing and guiding me. There, I want to work as a government officer focussing on cybersecurity. My parents were also government officers and they also want me to follow this path. I am excited to use what I learned in Germany and help protect our country's digital system from cybersecurity challenges. It is important to me to contribute to national security and make a positive impact in this field.

Conclusion:

Studying in Germany will significantly expand my knowledge and provide me with invaluable cybersecurity skills, which I aim to bring back to my home country. By leveraging the expertise gained in Germany, I aspire to contribute to the growth of my country alongside my father. I am committed to adhering to all rules and regulations in Germany and ensuring the timely completion of my studies. I eagerly await a favorable response to my application and hope for the approval of my student visa.

Your sincerely,
